

Managing Chronic Disease

Remote Care Management. Evolved.™

Vivifyhealth®

The Challenge

When complex illnesses are not tightly managed, the result is health complications—requiring acute interventions, ramping up costs, and reducing the quality of the patient experience.

Chronic disease is among the most widespread and costly health challenges in the US, and it is the nation's leading cause of disability and death. To achieve optimum clinical outcomes, address multiple quality measures, and manage patient expectations, healthcare providers need to vigilantly manage chronic diseases across clinically diverse populations.

CHRONIC DISEASE IS
AMONG THE MOST
WIDESPREAD AND
COSTLY HEALTH
CHALLENGES IN THE US,
AND IS THE NATION'S
LEADING CAUSE OF
DISABILITY AND DEATH.

The Solution

An intuitive and easy-to-use toolset that continually engages patients, drives positive behavior, and enables timely clinical intervention for effective chronic disease management.

The Value

The ability for patients to manage their conditions at home, with secure and immediate access to comprehensive information when and where it is needed — through the patient's preferred method. Effective reach of care management teams extends episodic care into proactive, ongoing care with a vigilant digital eye for early decompensation to enable timely interventions.

- ✓ Meet performance goals and increase market share.
- ✓ Enable and equip care teams with information and insights for timely intervention.
- ✓ Support self-management by linking consumers with proactive exchange of health tips and education.
- ✓ Power health system and payer portal strategies with connected, engaged patients.

Flip the page for how we do it...

Half of Americans suffer from **at least one chronic disease**, and one in four adults in the U.S. suffers from **two or more** chronic diseases.

The Value

Continual Care reduces costs, improves outcomes, and satisfies patients.

- ✓ Leverage a virtual platform for payer and provider collaboration with an intuitive interface that assesses patient status and provides a consistent, disciplined program for monitoring patient care.
- ✓ Provide actionable insights to clinical staff for timely care interventions.
- ✓ Automate clinical best practices to educate patients helping them adhere to their care plans.
- ✓ Meet shared value-based and cost-of-care goals.
- ✓ Optimize clinician workflow and improve staff productivity.
- ✓ Deliver responsive, continual, person-centered care that makes patients feel genuinely cared about – and increases their sense of well-being, empowerment, and loyalty to their care providers.

Care Across the Continuum

Ineffective and untimely patient management across the care continuum results in less than optimum patient outcomes – and unplanned acute care utilization.

Customers using the Vivify Health solution typically **reduce readmissions** by as much as **50 percent**.

Continual care technologies track and monitor patients across care settings — and bridge gaps in time, distance, and communication to transform patient care.
